1 Research papers: adaptive, automatic, autonomic systems: AGILE: adaptive indexing ◼
      for context-aware information filters
   Jens-Peter Dittrich, Peter M. Fischer, Donald Kossmann
      June 2005 **Proceedings of the 2005 ACM SIGMOD international conference on Management of data SIGMOD '05**
      Publisher: ACM Press
      Full text available: 📄 pdf(630.32 KB)   Additional Information: full citation, abstract, references, citings

> Information filtering has become a key technology for modern information systems. The goal of an information filter is to route messages to the right recipients (possibly none) according to declarative rules called profiles. In order to deal with high volumes of messages, several index structures have been proposed in the past. The challenge addressed in this paper is to carry out *stateful* information filtering in which profiles refer to values in a database or to previous messages. The d ...

2 Web technologies and applications (WTA): Context-aware filtering for collaborative ◼
      web systems: adapting the awareness information to the user's context
      Manuele Kirsch-Pinheiro, Marlène Villanova-Oliver, Jérôme Gensel, Hervé Martin
      March 2005 **Proceedings of the 2005 ACM symposium on Applied computing SAC '05**
      Publisher: ACM Press
      Full text available: 📄 pdf(252.79 KB)   Additional Information: full citation, abstract, references, citings, index terms

> We propose a context-based filtering process which aims at adapting the awareness information delivered to mobile users by collaborative web systems. This filtering process relies on a model of context which integrates both a physical and an organizational dimensions and allows to represent the user's current context as well as *general profiles*. These profiles are descriptions of user's potential contexts and express the awareness information filtering rules to apply when the user's curre ...

Keywords: awareness support, collaborative web systems, context-aware computing, user adaptation

3 Context-aware Retrieval: Exploring a New Environment for Information Retrieval and ◼
      Information Filtering
      P. J. Brown, G. J. F. Jones
      January 2001 **Personal and Ubiquitous Computing,** Volume 5 Issue 4
   **Publisher:** Springer-Verlag
      Full text available: 📄 pdf(112.84 KB)   Additional Information: full citation, abstract, citings, index terms

> The opportunities for context-aware computing are fast expanding. Computing systems

can be made aware of their environment by monitoring attributes such as their current location, the current time, the weather, or nearby equipment and users. Context-aware computing often involves retrieval of information: it introduces a new aspect to technologies for information delivery; currently these technologies are based mainly on contemporary approaches to information retrieval and information filtering. ...

4 Context-sensitive filtering for browsing in hypertext
Tsukasa Hirashima, Noriyuki Matsuda, Toyohiro Nomoto, Jun'ichi Toyoda
January 1998 **Proceedings of the 3rd international conference on Intelligent user interfaces IUI '98**
**Publisher:** ACM Press
Full text available: pdf(1.09 MB)   Additional Information: full citation, references, citings, index terms

Keywords: context-sensitive, hypertext browsing, information filtering

5 Doctoral consortium: Context-aware collaborative filtering system: predicting the user's preferences in ubiquitous computing
Annie Chen
April 2005 **CHI '05 extended abstracts on Human factors in computing systems CHI '05**
Publisher: ACM Press
Full text available: pdf(67.12 KB)   Additional Information: full citation, abstract, references, index terms

In this paper I propose a context-aware collaborative filtering system that can predict a user's preference in different context situations based on past user-experiences. The system uses what other like-minded users have done in similar context to predict a user's preference towards an item in the current context.

Keywords: collaborative filtering, context-aware, recommendation system, ubiquitous computing

6 Context sensitivity in role-based access control
Arun Kumar, Neeran Karnik, Girish Chafle
July 2002 **ACM SIGOPS Operating Systems Review**, Volume 36 Issue 3
Publisher: ACM Press
Full text available: pdf(886.37 KB)   Additional Information: full citation, abstract, references, citings

This paper describes an extended role-based access control (RBAC) model, which makes RBAC sensitive to the *context* of an attempted operation. Traditional RBAC does not specify whether the permissions associated with a role enable access to a *particular* object, or to some *subset* of objects belonging to a class. We extend the model by introducing the notions of role context and context filters. Context filters are Boolean expressions based on the context of the user attempting ...

7 A blackboard-based architecture for filtering new software features
Masashi Uyama
December 1993 **Proceedings of the conference on Organizational computing systems COCS '93**
Publisher: ACM Press
Full text available: pdf(946.32 KB)   Additional Information: full citation, references, citings, index terms

Keywords: context sensitivity, information filtering, intelligent assistance, modifiability, organizational memory, task model, trialability

8 Evaluating collaborative filtering recommender systems

Jonathan L. Herlocker, Joseph A. Konstan, Loren G. Terveen, John T. Riedl
January 2004 **ACM Transactions on Information Systems (TOIS)**, Volume 22 Issue 1

Publisher: ACM Press

Full text available: pdf(253.92 KB)   Additional Information: full citation, abstract, references, citings, index terms

> Recommender systems have been evaluated in many, often incomparable, ways. In this article, we review the key decisions in evaluating collaborative filtering recommender systems: the user tasks being evaluated, the types of analysis and datasets being used, the ways in which prediction quality is measured, the evaluation of prediction attributes other than quality, and the user-based evaluation of the system as a whole. In addition to reviewing the evaluation strategies used by prior researchers ...

9 Empirical methods and program understanding: Using task context to improve programmer productivity

Mik Kersten, Gail C. Murphy
November 2006 **Proceedings of the 14th ACM SIGSOFT international symposium on Foundations of software engineering SIGSOFT '06/FSE-14**

Publisher: ACM Press

Full text available: pdf(512.26 KB)   Additional Information: full citation, abstract, references, index terms

> When working on a large software system, a programmer typically spends an inordinate amount of time sifting through thousands of artifacts to find just the subset of information needed to complete an assigned task. All too often, before completing the task the programmer must switch to working on a different task. These task switches waste time as the programmer must repeatedly find and identify the information relevant to the task-at-hand. In this paper, we present a mechanism that captures, mo ...

10 Refinement-based context-sensitive points-to analysis for Java

Manu Sridharan, Rastislav Bodík
June 2006 **ACM SIGPLAN Notices , Proceedings of the 2006 ACM SIGPLAN conference on Programming language design and implementation PLDI '06**, Volume 41 Issue 6

Publisher: ACM Press

Full text available: pdf(311.54 KB)   Additional Information: full citation, abstract, references, index terms

> We present a scalable and precise context-sensitive points-to analysis with three key properties: (1) filtering out of unrealizable paths, (2) a context-sensitive heap abstraction, and (3) a context-sensitive call graph. Previous work [21] has shown that all three properties are important for precisely analyzing large programs, e.g., to show safety of downcasts. Existing analyses typically give up one or more of the properties for scalability. We have developed a refinement-based analysis that s ...

> **Keywords**: context-sensitive analysis, demand-driven analysis, points-to analysis, refinement

11 Cloning-based context-sensitive pointer alias analysis using binary decision diagrams

John Whaley, Monica S. Lam
June 2004 **ACM SIGPLAN Notices , Proceedings of the ACM SIGPLAN 2004 conference on Programming language design and implementation PLDI '04**, Volume 39 Issue 6

Publisher: ACM Press

Full text available: pdf(277.87 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

This paper presents the first scalable context-sensitive, inclusion-based pointer alias analysis for Java programs. Our approach to context sensitivity is to create a clone of a method for every context of interest, and run a *context-insensitive* algorithm over the expanded call graph to get *context-sensitive* results. For precision, we generate a clone for every acyclic path through a program's call graph, treating methods in a strongly connected component as a single node. Normally ...

Keywords: Datalog, Java, binary decision diagrams, cloning, context-sensitive, inclusion-based, logic programming, pointer analysis, program analysis, scalable

12 Adding filtering to geometric distortion to visualize a clustered graph on small screens

Wanchun Li, Masahiro Takatsuka
January 2004 **Proceedings of the 2004 Australasian symposium on Information Visualisation - Volume 35 APVis '04**
Publisher: Australian Computer Society, Inc.
Full text available: pdf(313.82 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

Presenting large amounts of information in a limited screen space is a significant challenge in the field of Information Visualization. With the rapid development and growing use of small handheld devices such as PDAs this issue has become more important. Many Focus+Context techniques have been developed to address it but very few of them would effectively aid visualization applications for small handheld devices.In this paper we propose a new approach for visualizing a clustered graph by adding ...

Keywords: Focus+Context, PDA, clustered graph, fisheye, graph visualization, small screen display

13 Collecting user access patterns for building user profiles and collaborative filtering

Ahmad M. Ahmad Wasfi
December 1998 **Proceedings of the 4th international conference on Intelligent user interfaces IUI '99**
Publisher: ACM Press
Full text available: pdf(1.29 MB)   Additional Information: <u>full citation</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

Keywords: autonomous agent, classical information theory, collaborative filtering, content-based filtering, finite context-model

14 The packer filter: an efficient mechanism for user-level network code

J. Mogul, R. Rashid, M. Accetta
November 1987 **ACM SIGOPS Operating Systems Review , Proceedings of the eleventh ACM Symposium on Operating systems principles SOSP '87,** Volume 21 Issue 5
Publisher: ACM Press
Full text available: pdf(1.21 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

Code to implement network protocols can be either inside the kernel of an operating system or in user-level processes. Kernel-resident code is hard to develop, debug, and maintain, but user-level implementations typically incur significant overhead and perform poorly.The performance of user-level network code depends on the mechanism used to demultiplex received packets. Demultiplexing in a user-level process increases the rate of context switches and system calls, resulting in p ...

15 The movable filter as a user interface tool

Maureen C. Stone, Ken Fishkin, Eric A. Bier
April 1994 **Proceedings of the SIGCHI conference on Human factors in computing systems: celebrating interdependence CHI '94**
Publisher: ACM Press
Full text available: pdf(986.82 KB)   Additional Information: <u>full citation</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

Keywords: editing, graphics, lens, macro, transparent, viewing filter, visualization

16 Network layer access control for context-aware IPv6 applications
Adrian Friday, Maomao Wu, Joe Finney, Stefan Schmid, Keith Cheverst, Nigel Davies
July 2003 **Wireless Networks**, Volume 9 Issue 4
Publisher: Kluwer Academic Publishers
Full text available: pdf(3.57 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

As part of the Lancaster GUIDE II project, we have developed a novel wireless access point protocol designed to support the development of next generation mobile context-aware applications in our local environs. Once deployed, this architecture will allow ordinary citizens secure, accountable and convenient access to a set of tailored applications including location, multimedia and context based services, and the public Internet. Our architecture utilises packet marking and network level packet ...

Keywords: authentication, mobile IPv6, public access point, security, wireless Internet

17 Information filtering and information retrieval: two sides of the same coin?
Nicholas J. Belkin, W. Bruce Croft
December 1992 **Communications of the ACM**, Volume 35 Issue 12
Publisher: ACM Press
Full text available: pdf(3.58 MB)   Additional Information: <u>full citation</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>, <u>review</u>

Keywords: information filtering, information retrieval

18 A comparison of rule-invocation strategies in context-free chart parsing
Mats Wirén
April 1987 **Proceedings of the third conference on European chapter of the Association for Computational Linguistics**
Publisher: Association for Computational Linguistics
Full text available: pdf(685.21 KB)
Publisher Site   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>

Currently several grammatical formalisms converge towards being declarative and towards utilizing context-free phrase-structure grammar as a back-bone, e.g. LFG and PATR-II. Typically the processing of these formalisms is organized within a chart-parsing framework. The declarative character of the formalisms makes it important to decide upon an overall optimal control strategy on the part of the processor. In particular, this brings the rule-invocation strategy into critical focus: to gain maxim ...

19 Undecidability of context-sensitive data-independence analysis
Thomas Reps
January 2000 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 22 Issue 1
Publisher: ACM Press
Full text available: pdf(228.77 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u>

terms

A number of program-analysis problems can be tackled by transforming them into certain kinds of graph-reachability problems in labeled directed graphs. The edge labels can be used to filter out paths that are not interest: a path P from vertex s to vertex t only counts as a "valid connection" between s and t if the word spelled out by P is in a certain language. Often the languag ...

Keywords: ∞ , context-sensitive program-analysis, control-flow analysis, dependence analysis, graph-reachability problem, linear matche-parenthesis language, set constraints, set-based analysis, structure-transmitted data-dependence

20 Filter-based model checking of partial systems

Matthew B. Dwyer, Corina S. Pasareanu

November 1998 **ACM SIGSOFT Software Engineering Notes , Proceedings of the 6th ACM SIGSOFT international symposium on Foundations of software engineering SIGSOFT '98/FSE-6**, Volume 23 Issue 6

Publisher: ACM Press

Full text available: pdf(1.43 MB)   Additional Information: full citation, abstract, references, citings, index terms

Recent years have seen dramatic growth in the application of model checking techniques to the validation and verification of correctness properties of hardware, and more recently software, systems. Most of this work has been aimed at reasoning about properties of complete systems. This paper describes an automatable approach for building finite-state models of partially defined software systems that are amenable to model checking using existing tools. It enables the application of existing model ...

Keywords: assume-guarantee reasoning, filter-based analysis, model checking, software verification and validation

21 The use of dynamic contexts to improve casual internet searching

Gondy Leroy, Ann M. Lally, Hsinchun Chen
July 2003 **ACM Transactions on Information Systems (TOIS)**, Volume 21 Issue 3
Publisher: ACM Press
Full text available: 📄 pdf(231.61 KB) . Additional Information: full citation, abstract, references, index terms

Research has shown that most users' online information searches are suboptimal. Query optimization based on a relevance feedback or genetic algorithm using dynamic query contexts can help casual users search the Internet. These algorithms can draw on implicit user feedback based on the surrounding links and text in a search engine result set to expand user queries with a variable number of keywords in two manners. Positive expansion adds terms to a user's keywords with a Boolean "and," negative ...

Keywords: Information retrieval, Internet, automatic query expansion, genetic algorithm, implicit user feedback, personalization, relevance feedback

22 Incremental relevance feedback for information filtering

James Allan
August 1996 **Proceedings of the 19th annual international ACM SIGIR conference on Research and development in information retrieval SIGIR '96**
Publisher: ACM Press
Full text available: 📄 pdf(892.54 KB)   Additional Information: full citation, references, citings, index terms

23 Personal information management: Fast, flexible filtering with phlat

Edward Cutrell, Daniel Robbins, Susan Dumais, Raman Sarin
April 2006 **Proceedings of the SIGCHI conference on Human Factors in computing systems CHI '06**
Publisher: ACM Press
Full text available: 📄 pdf(1.46 MB)   Additional Information: full citation, abstract, references, citings, index terms

Systems for fast search of personal information are rapidly becoming ubiquitous. Such systems promise to dramatically improve personal information management, yet most are modeled on Web search in which users know very little about the content that they are searching. We describe the design and deployment of a system called Phlat that optimizes search for personal information with an intuitive interface that merges search and browsing through a variety of associative and contextual cues. In addi ...

Keywords: PIM, interactive information retrieval, personal information management, search interface, tagging, user interfaces

24 Empirical evaluation of testing: An empirical evaluation of test case filtering techniques based on exercising complex information flows

David Leon, Wes Masri, Andy Podgurski

May 2005 **Proceedings of the 27th international conference on Software engineering ICSE '05 , Proceedings of the 27th international conference on Software engineering ICSE '05**

Publisher: ACM Press, IEEE Computer Society

Full text available: pdf(132.08 KB)   Additional Information: full citation, abstract, references, citings, index terms
Publisher Site

Some software defects trigger failures only when certain complex information flows occur within the software. Profiling and analyzing such flows therefore provides a potentially important basis for filtering test cases. We report the results of an empirical evaluation of several test case filtering techniques that are based on exercising complex information flows. Both coverage-based and profile-distribution-based filtering techniques are considered. They are compared to filtering techniques bas ...

25 Special topic section on peer to peer data management: In-context peer-to-peer information filtering on the Web

Aris M. Ouksel

September 2003 **ACM SIGMOD Record**, Volume 32 Issue 3

Publisher: ACM Press

Full text available: pdf(99.39 KB)   Additional Information: full citation, references

26 New search paradigms: Searching with context

Reiner Kraft, Chi Chao Chang, Farzin Maghoul, Ravi Kumar

May 2006 **Proceedings of the 15th international conference on World Wide Web WWW '06**

Publisher: ACM Press

Full text available: pdf(191.91 KB)   Additional Information: full citation, abstract, references, index terms

Contextual search refers to proactively capturing the information need of a user by automatically augmenting the user query with information extracted from the search context; for example, by using terms from the web page the user is currently browsing or a file the user is currently editing.We present three different algorithms to implement contextual search for the Web. The first, *it query rewriting (QR)*, augments each query with appropriate terms from the search context and uses an off ...

Keywords: contextual search, meta-search, rank aggregation, specialized search engines, web search

27 AAA, security and privacy: Context-aware privacy protection with profile management

Anelia Mitseva, Mohamad Imine, Neeli R. Prasad

September 2006 **Proceedings of the 4th international workshop on Wireless mobile applications and services on WLAN hotspots WMASH '06**

Publisher: ACM Press

Full text available: pdf(472.85 KB)   Additional Information: full citation, abstract, references, index terms

Hotspot services will be offered in small, highly-populated public places like airports, hospitals, etc. They will play their assistive roles in the people's life only if they are secure, trusted, and nonobtrusive. Some of the challenges faced are the seamless operation

between WLAN-based hotspots and other emerging wireless data networks technologies, for example body sensor networks; the exploitation of context- and location-aware information provided from the hotspot service; matching the use ...

Keywords: adaptive privacy protection, context-awareness, hotspots, location-awareness, personalization, secure profile management, smart spaces, user data minimization, wireless sensor networks

28 Context-sensitive electronic dictionaries
Gábor Prószéky, Balázs Kis
August 2002 **Proceedings of the 19th international conference on Computational linguistics - Volume 2**
Publisher: Association for Computational Linguistics
Full text available: pdf(64.18 KB)   Additional Information: full citation, abstract, references

This paper introduces a context-sensitive electronic dictionary that provides translations for any piece of text displayed on a computer screen, without requiring user interaction. This is achieved through a process of three phases: text acquisition from the screen, morpho-syntactic analysis of the context of the selected word, and the dictionary lookup. As with other similar tools available, this program usually works with dictionaries adapted from one or more printed dictionaries. To implement ...

29 Applying associative retrieval techniques to alleviate the sparsity problem in collaborative filtering
Zan Huang, Hsinchun Chen, Daniel Zeng
January 2004 **ACM Transactions on Information Systems (TOIS)**, Volume 22 Issue 1
Publisher: ACM Press
Full text available: pdf(173.30 KB)   Additional Information: full citation, abstract, references, citings, index terms

Recommender systems are being widely applied in many application settings to suggest products, services, and information items to potential consumers. Collaborative filtering, the most successful recommendation approach, makes recommendations based on past transactions and feedback from consumers sharing similar interests. A major problem limiting the usefulness of collaborative filtering is the sparsity problem, which refers to a situation in which transactional or feedback data is sparse and i ...

30 Information access and retrieval: Exploiting contextual change in context-aware retrieval
Peter J. Brown, Gareth J. F. Jones
March 2002 **Proceedings of the 2002 ACM symposium on Applied computing SAC '02**
**Publisher:** ACM Press
Full text available: pdf(737.18 KB)   Additional Information: full citation, abstract, references, citings, index terms

Information retrieval systems are usually unaware of the context in which they are being used. We believe that exploiting context information to augment existing retrieval methods can lead to increased retrieval precision. This approach is particularly important with the development of wireless mobile information appliances, such as PDAs. Many of these devices are aware of the user's physical context, and this has led to the evolution of *context-aware applications.* Such applications can a ...

35 Data exploration across temporal contexts

Mark Derthick, Steven F. Roth

January 2000 **Proceedings of the 5th international conference on Intelligent user interfaces IUI '00**

Publisher: ACM Press

Full text available: pdf(1.48 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

The ability to quickly explore and compare multiple scenarios is an important component of exploratory data analysis. Yet today's interfaces cannot represent alternative exploration paths as a branching history, forcing the user to recognize conceptual branch points in a linear history. Further, the interface can only show information from one state at a time, forcing the user to use her memory to compare scenarios. Our system includes a tree-structured visualization for navigati ...

37 Flexible team-based access control using contexts

Christos K. Georgiadis, Ioannis Mavridis, George Pangalos, Roshan K. Thomas
May 2001 **Proceedings of the sixth ACM symposium on Access control models and technologies SACMAT '01**
Publisher: ACM Press

Full text available: pdf(186.36 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

We discuss the integration of contextual information with team-based access control. The TMAC model was formulated by Thomas in [1] to provide access control for collaborative activity best accomplished by teams of users. In TMAC, access control revolves around teams, where a "team" is an abstraction that encapsulates a collection of users in specific roles and collaborating with the objective of accomplishing a specific task or goal. Users who belong to a team are given access to resources ...

38 Information access for context-aware appliances (poster session)

Gareth J. F. Jones, Peter J. Brown
July 2000 **Proceedings of the 23rd annual international ACM SIGIR conference on Research and development in information retrieval SIGIR '00**
Publisher: ACM Press

Full text available: pdf(310.36 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

The emergence of networked context-aware mobile computing appliances potentially offers opportunities for remote access to huge online information resources. Information access in context-aware information appliances can utilize existing techniques developed for effective information retrieval and information filtering; however, practical physical and operational features of these devices and the availability of context information itself

suggest that the document selection process should mak ...

39 Using frequency-of-mention in public conversations for social filtering

Will Hill, Loren Terveen
November 1996 **Proceedings of the 1996 ACM conference on Computer supported
cooperative work CSCW '96**

40 Beyond document similarity: understanding value-based search and browsing technologies

Andreas Paepcke, Hector Garcia-Molina, Gerard Rodriguez-Mula, Junghoo Cho
March 2000 **ACM SIGMOD Record**, Volume 29 Issue 1
Publisher: ACM Press
Full text available: pdf(1.29 MB)   Additional Information: full citation, abstract, citings, index terms

In the face of small, one or two word queries, high volumes of diverse documents on the Web are overwhelming search and ranking technologies that are based on document similarity measures. The increase of multimedia data within documents sharply exacerbates the shortcomings of these approaches. Recently, research prototypes and commercial experiments have added techniques that augment similarity-based search and ranking. These techniques rely on judgments about the 'value' of documents. Jud ...

41 Implicit context: easing software evolution and reuse   ▭

Robert J. Walker, Gail C. Murphy
November 2000 **ACM SIGSOFT Software Engineering Notes , Proceedings of the 8th ACM SIGSOFT international symposium on Foundations of software engineering: twenty-first century applications SIGSOFT '00/FSE-8,** Volume 25 Issue 6

Publisher: ACM Press

Full text available: 📄 pdf(1.24 MB)   Additional Information: full citation, abstract, references, citings, index terms

Software systems should consist of simple, conceptually clean software components interacting along narrow, well-defined paths. All too often, this is not reality: complex components end up interacting for reasons unrelated to the functionality they provide. We refer to knowledge within a component that is not conceptually required for the individual behaviour of that component as extraneous embedded knowledge (EEK). EEK creeps into a system in many forms, including dependences upon particula ...

42 Hardware-Based Nonlinear Filtering and Segmentation using High-Level Shading Languages   ▭

Ivan Viola, Armin Kanitsar, Meister Eduard Groller
October 2003 **Proceedings of the 14th IEEE Visualization 2003 (VIS'03) VIS '03**

Publisher: IEEE Computer Society

Full text available: 📄 pdf(11.33 MB)   Additional Information: full citation, abstract

Non-linear filtering is an important task for volume analysis.This paper presents hardware-based implementations of various non-linear filters for volume smoothing with edge preservation.TheCg high-level shading language is used in combination with latest PC consumer graphics hardware.Filtering is divided into pervertex and per-fragment stages.In both stages we propose techniques to increase the filtering performance.The vertex program pre-computes texture coordinates in order to address all con ...

43 Improving the effectiveness of information retrieval with local context analysis   ▭

Jinxi Xu, W. Bruce Croft
January 2000 **ACM Transactions on Information Systems (TOIS),** Volume 18 Issue 1

Publisher: ACM Press

Full text available: pdf(193.02 KB)   Additional Information: full citation, abstract, references, citings, index terms, review

Techniques for automatic query expansion have been extensively studied in information research as a means of addressing the word mismatch between queries and documents. These techniques can be categorized as either global or local. While global techniques rely on analysis of a whole collection to discover word relationships, local techniques emphasize analysis of the top-ranked documents retrieved for a query. While local techniques have shown to be more effective that global techniques in ...

44 Incorporating context information for the extraction of terms

Katerina T. Frantzi

July 1997 **Proceedings of the 35th annual meeting on Association for Computational Linguistics , Proceedings of the eighth conference on European chapter of the Association for Computational Linguistics**

Publisher: Association for Computational Linguistics

Full text available: pdf(262.44 KB)
Publisher Site
           Additional Information: full citation, abstract, references

The information used for the extraction of terms can be considered as rather 'internal', i.e. coming from the candidate string itself. This paper presents the incorporation of 'external' information derived from the context of the candidate string. It is embedded to the *C-value* approach for automatic term recognition (ATR), in the form of weights constructed from statistical characteristics of the context words of the candidate string.

45 Poster paper sessions: A semantic web environment for context-aware m-commerce

Norman M. Sadeh, Ting-Chak Chan, Linh Van, OhByung Kwon, Kazuaki Takizawa

June 2003 **Proceedings of the 4th ACM conference on Electronic commerce EC '03**

Publisher: ACM Press

Full text available: pdf(146.80 KB)   Additional Information: full citation, abstract, references, index terms

In this paper, we introduce MyCampus, a Semantic Web environment for context-aware mobile services, which we are in the process of developing and validating on Carnegie Mellon University's campus. The environment revolves around a growing collection of customizable agents capable of (semi-) automatically discovering and accessing user personal resources (e.g. calendar, location tracking functionality, food preferences) and Web services as they assist their users in carrying out different tasks s ...

46 Object tracking: A survey

Alper Yilmaz, Omar Javed, Mubarak Shah

December 2006 **ACM Computing Surveys (CSUR)**, Volume 38 Issue 4

Publisher: ACM Press

Full text available: pdf(2.60 MB)   Additional Information: full citation, abstract, references, index terms

The goal of this article is to review the state-of-the-art tracking methods, classify them into different categories, and identify new trends. Object tracking, in general, is a challenging problem. Difficulties in tracking objects can arise due to abrupt object motion, changing appearance patterns of both the object and the scene, nonrigid object structures, object-to-object and object-to-scene occlusions, and camera motion. Tracking is usually performed in the context of higher-level applicatio ...

47 Static checking of system behaviors using derived component assumptions

Paola Inverardi, Alexander L. Wolf, Daniel Yankelevich

July 2000 **ACM Transactions on Software Engineering and Methodology (TOSEM),**
Volume 9 Issue 3

Publisher: ACM Press

Full text available: pdf(600.26 KB)   Additional Information: full citation, abstract, references, citings, index terms

A critical challenge faced by the developer of a software system is to understand whether the system's components correctly integrate. While type theory has provided substantial help in detecting and preventing errors in mismatched static properties, much work remains in the area of dynamics. In particular, components make assumptions about their behavioral interaction with other components, but currently we have only limited ways in which to state those assumptions and to analyze those as ...

50 Type-based publish/subscribe: Concepts and experiences

Patrick Eugster

January 2007 **ACM Transactions on Programming Languages and Systems (TOPLAS),**
Volume 29 Issue 1

Publisher: ACM Press

Full text available: pdf(822.39 KB)   Additional Information: full citation, abstract, references, index terms

A continuously increasing number of interconnected computer devices makes the requirement for programming abstractions for remote one-to-many interaction yet more stringent. The publish/subscribe paradigm has been advocated as a candidate abstraction for such one-to-many interaction at large scale. Common practices in publish/subscribe, however, include low-level abstractions which hardly leverage type safety, and provide only poor support for object encapsulation. This tends to put additional b ...

A major research goal for compilers and environments is the automatic derivation of tools from formal specifications. However, the formal model of the language is often inadequate; in particular, LR(k) grammars are unable to describe the natural syntax of many languages, such as C^{++} and Fortran, which are inherently non-deterministic. Designers of batch compilers work around such limitations by combining generated components with ad hoc techniques (for instance, performing part ...

53 Preserving and using context information in interprocess communication

Larry L. Peterson, Nick C. Buchholz, Richard D. Schlichting

August 1989 **ACM Transactions on Computer Systems (TOCS),** Volume 7 Issue 3

Publisher: ACM Press

Full text available: pdf(2.47 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>, <u>review</u>

When processes in a network communicate, the messages they exchange define a partial ordering of externally visible events. While the significance of this partial order in distributed computing is well understood, it has not been made an explicit part of the communication substrate upon which distributed programs are implemented. This paper describes a new interprocess communication mechanism, called Psync, that explicitly encodes this partial ordering with each message. Th ...

54 The effects of filtered video on awareness and privacy

Michael Boyle, Christopher Edwards, Saul Greenberg

December 2000 **Proceedings of the 2000 ACM conference on Computer supported cooperative work CSCW '00**

Publisher: ACM Press

Full text available: pdf(1.62 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

Video-based media spaces are designed to support casual interaction between intimate collaborators. Yet transmitting video is fraught with privacy concerns. Some researchers suggest that the video stream be filtered to mask out potentially sensitive information. While a variety of filtering techniques exist, they have not been evaluated for how well they safeguard privacy. In this paper, we analyze how a blur and a pixelize video filter might impact both awareness and privacy in ...

56 General papers: Text filtering in MUC-3 and MUC-4
David D. Lewis, Richard M. Tong
June 1992 **Proceedings of the 4th conference on Message understanding MUC4 '92**
Publisher: Association for Computational Linguistics
Full text available: 📄 pdf(939.00 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>

One of the changes from the Third (MUC-3) to the Fourth (MUC-4) Message Understanding Conference was the emergence of text filtering as an explicit topic of discussion. In this paper we examine text filtering in MUC systems with three goals in mind. First, we clarify the difference between two uses of the term "text filtering" in the context of data extraction systems, and put these phenomena in the context of prior research on information retrieval (IR).

57 Incorporating contextual information in recommender systems using a multidimensional approach
Gediminas Adomavicius, Ramesh Sankaranarayanan, Shahana Sen, Alexander Tuzhilin
January 2005 **ACM Transactions on Information Systems (TOIS)**, Volume 23 Issue 1
Publisher: ACM Press
Full text available: 📄 pdf(423.91 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

The article presents a multidimensional (MD) approach to recommender systems that can provide recommendations based on additional contextual information besides the typical information on users and items used in most of the current recommender systems. This approach supports multiple dimensions, profiling information, and hierarchical aggregation of recommendations. The article also presents a multidimensional rating estimation method capable of selecting two-dimensional segments of ratings pert ...

58 Explaining collaborative filtering recommendations
Jonathan L. Herlocker, Joseph A. Konstan, John Riedl
December 2000 **Proceedings of the 2000 ACM conference on Computer supported cooperative work CSCW '00**
Publisher: ACM Press
Full text available: 📄 pdf(167.40 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

Automated collaborative filtering (ACF) systems predict a person's affinity for items or information by connecting that person's recorded interests with the recorded interests of a community of people and sharing ratings between like-minded persons. However, current recommender systems are black boxes, providing no transparency into the working of the recommendation. Explanations provide that transparency, exposing the reasoning and data behind a recommendation. In this paper, we address ex ...

1 Fast detection of communication patterns in distributed executions
Thomas Kunz, Michiel F. H. Seuren
November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research CASCON '97**
Publisher: IBM Press
Full text available: 📄 pdf(4.21 MB)   Additional Information: full citation, abstract, references, index terms

> Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

2 Schema mediation for large-scale semantic data sharing
Y. Halevy, G. Ives, Dan Suciu, Igor Tatarinov
March 2005 **The VLDB Journal — The International Journal on Very Large Data Bases,** Volume 14 Issue 1
Publisher: Springer-Verlag New York, Inc.
Full text available: 📄 pdf(267.95 KB)   Additional Information: full citation, abstract

> Intuitively, data management and data integration tools should be well suited for exchanging information in a semantically meaningful way. Unfortunately, they suffer from two significant problems: they typically require a common and comprehensive schema design before they can be used to store or share information, and they are difficult to extend because schema evolution is heavyweight and may break backward compatibility. As a result, many large-scale data sharing tasks are more easily facilita ...

5   Special issue: AI in engineering

D. Sriram, R. Joobbani
April 1985 **ACM SIGART Bulletin**, Issue 92

Publisher: ACM Press

Full text available: pdf(8.79 MB)   Additional Information: full citation, abstract

The papers in this special issue were compiled from responses to the announcement in the July 1984 issue of the SIGART newsletter and notices posted over the ARPAnet. The interest being shown in this area is reflected in the sixty papers received from over six countries. About half the papers were received over the computer network.

6   Principled design of the modern Web architecture

Roy T. Fielding, Richard N. Taylor
May 2002 **ACM Transactions on Internet Technology (TOIT)**, Volume 2 Issue 2

Publisher: ACM Press

Full text available: pdf(335.47 KB)   Additional Information: full citation, abstract, references, citings, index terms

The World Wide Web has succeeded in large part because its software architecture has been designed to meet the needs of an Internet-scale distributed hypermedia application. The modern Web architecture emphasizes scalability of component interactions, generality of interfaces, independent deployment of components, and intermediary components to reduce interaction latency, enforce security, and encapsulate legacy systems. In this article we introduce the Representational State Transfer (REST) arc ...

7   Research articles and surveys: Peer-to-peer management of XML data: issues and research challenges

Georgia Koloniari, Evaggelia Pitoura
June 2005 **ACM SIGMOD Record**, Volume 34 Issue 2

Publisher: ACM Press

Full text available: pdf(301.94 KB)   Additional Information: full citation, abstract, references, index terms

Peer-to-peer (p2p) systems are attracting increasing attention as an efficient means of sharing data among large, diverse and dynamic sets of users. The widespread use of XML as a standard for representing and exchanging data in the Internet suggests using XML for describing data shared in a p2p system. However, sharing XML data imposes new challenges in p2p systems related to supporting advanced querying beyond simple keyword-based retrieval. In this paper, we focus on data management issues fo ...

The Visual Semantic Web (ViSWeb) is a new paradigm for enhancing the current Semantic Web technology. Based on Object-Process Methodology (OPM), which enables modeling of systems in a single graphic and textual model, ViSWeb provides for representation of knowledge over the Web in a unified way that caters to human perceptions while also being machine processable. The advantages of the ViSWeb approach include equivalent graphic-text knowledge representation, visual navigability, semantic sentenc ...

It is accepted wisdom that the current Internet architecture conflates network locations and host identities, but there is no agreement on how a future architecture should distinguish the two. One could sidestep this quandary by routing directly on host identities themselves, and eliminating the need for network-layer protocols to include any mention of network location. The key to achieving this is the ability to route on flat labels. In this paper we take an initial stab at this challenge, pro ...

Level set methods, an important class of partial differential equation (PDE) methods, define dynamic surfaces implicitly as the level set (iso-surface) of a sampled, evolving nD function. The course begins with preparatory material that introduces the concept of using partial differential equations to solve problems in computer graphics, geometric modeling and computer vision. This will include the structure and behavior of several different types of differential equations, e.g. the level set eq ...

13 eTuner: tuning schema matching software using synthetic scenarios

Yoonkyong Lee, Mayssam Sayyadian, AnHai Doan, Arnon S. Rosenthal
October 2006 **The VLDB Journal — The International Journal on Very Large Data Bases**, Volume 16 Issue 1
Publisher: Springer-Verlag New York, Inc.
Full text available: pdf(1.01 MB)   Additional Information: full citation, abstract, index terms

Most recent schema matching systems assemble *multiple components*, each employing a particular matching technique. The domain user mustthen *tune* the system: select the right component to be executed and correctly adjust their numerous "knobs" (e.g., thresholds, formula coefficients). Tuning is skill and time intensive, but (as we show) without it the matching accuracy is significantly inferior. We describe eTuner, an approach to *automatically* tune schema matchin ...

Full text available: pdf(3.14 MB)   Additional Information: full citation, abstract, index terms

One problem in computer program testing arises when errors are found and corrected after a portion of the tests have run properly. How can it be shown that a fix to one area of the code does not adversely affect the execution of another area? What is needed is a quantitative method for assuring that new program modifications do not introduce new errors into the code. This model considers the retest philosophy that every program instruction that could possibly be reached and tested from the ...

19 Document structure and content analysis 2: Schema matching for transforming structured documents

Aida Boukottaya, Christine Vanoirbeek

November 2005 **Proceedings of the 2005 ACM symposium on Document engineering DocEng '05**

Publisher: ACM Press

Full text available: pdf(441.70 KB)   Additional Information: full citation, abstract, references, index terms

Structured document content reuse is the problem of restructuring and translating data structured under a source schema into an instance of a target schema. A notion closely tied with structured document reuse is that of structure transformations. Schema matching is a critical strep in structured document transformations. Manual matching is

expensive and error-prone. It is therefore important to develop techniques to automate
the matching process and thus the transformation process. In this pape ...

20 Streams, structures, spaces, scenarios, societies (5s): A formal model for digital
libraries
Marcos André Gonçalves, Edward A. Fox, Layne T. Watson, Neill A. Kipp
April 2004 **ACM Transactions on Information Systems (TOIS)**, Volume 22 Issue 2
Publisher: ACM Press

Full text available: pdf(316.85 KB)   Additional Information: full citation, abstract, references, citings, index
terms, review

Digital libraries (DLs) are complex information systems and therefore demand formal
foundations lest development efforts diverge and interoperability suffers. In this article, we
propose the fundamental abstractions of Streams, Structures, Spaces, Scenarios, and
Societies (5S), which allow us to define digital libraries rigorously and usefully. Streams
are sequences of arbitrary items used to describe both static and dynamic (e.g., video)
content. Structures can be viewed as labeled directed gra ...

Abstraction is an important issue in intrusion detection, since it not only hides the difference between heterogeneous systems, but also allows generic intrusion-detection models. However, abstraction is an error-prone process and is not well supported in current intrusion-detection systems (IDSs). This article presents a hierarchical model to support attack specification and event abstraction in distributed intrusion detection. The model involves three concepts: *system view, signature* ...

January 2007 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 29 Issue 1

Publisher: ACM Press

Full text available: pdf(822.39 KB)   Additional Information: full citation, abstract, references, index terms

A continuously increasing number of interconnected computer devices makes the requirement for programming abstractions for remote one-to-many interaction yet more stringent. The publish/subscribe paradigm has been advocated as a candidate abstraction for such one-to-many interaction at large scale. Common practices in publish/subscribe, however, include low-level abstractions which hardly leverage type safety, and provide only poor support for object encapsulation. This tends to put additional b ...

Jintae Lee, Thomas W. Malone
January 1990 **ACM Transactions on Information Systems (TOIS),** Volume 8 Issue 1
**Publisher:** ACM Press

Full text available: pdf(2.17 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>, <u>review</u>

> Many computer systems are based on various types of messages, forms, or other objects. When users of such systems need to communicate with people who use different object types, some kind of translation is necessary. In this paper, we explore the space of general solutions to this translation problem and propose a scheme that synthesizes these solutions. After first illustrating the problem in the Object Lens system, we identify two partly conflicting objectives that any translation scheme ...

45 Information systems interoperability: What lies beneath?

Jinsoo Park, Sudha Ram
October 2004 **ACM Transactions on Information Systems (TOIS),** Volume 22 Issue 4
Publisher: ACM Press

Full text available: pdf(824.78 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

> Interoperability is the most critical issue facing businesses that need to access information from multiple information systems. Our objective in this research is to develop a comprehensive framework and methodology to facilitate semantic interoperability among distributed and heterogeneous information systems. A comprehensive framework for managing various semantic conflicts is proposed. Our proposed framework provides a unified view of the underlying representational and reasoning formalism ...

46 Natural semantics as a static program analysis framework

Sabine Glesner, Wolf Zimmermann
May 2004 **ACM Transactions on Programming Languages and Systems (TOPLAS),** Volume 26 Issue 3
Publisher: ACM Press
Full text available: pdf(649.73 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

> Natural semantics specifications have become mainstream in the formal specification of programming language semantics during the last 10 years. In this article, we set up sorted natural semantics as a specification framework which is able to express static semantic information of programming languages declaratively in a uniform way and allows one at the same time to generate corresponding analyses. Such static semantic information comprises context-sensitive properties which are checked in the s ...

47 Process modeling in Web applications

Marco Brambilla, Stefano Ceri, Piero Fraternali, Ioana Manolescu
October 2006 **ACM Transactions on Software Engineering and Methodology (TOSEM),** Volume 15 Issue 4

Publisher: ACM Press

Full text available: pdf(1.17 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

While Web applications evolve towards ubiquitous, enterprise-wide or multienterprise information systems, they face new requirements, such as the capability of managing complex processes spanning multiple users and organizations, by interconnecting software provided by different organizations. Significant efforts are currently being invested in application integration, to support the composition of business processes of different companies, so as to create complex, multiparty business scenarios. ...

48 <u>Trust management for IPsec</u>

May 2002 **ACM Transactions on Information and System Security (TISSEC)**, Volume 5 Issue 2

Publisher: ACM Press

Full text available: pdf(321.98 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>, <u>review</u>

IPsec is the standard suite of protocols for network-layer confidentiality and authentication of Internet traffic. The IPsec protocols, however, do not address the policies for how protected traffic should be handled at security end points. This article introduces an efficient policy management scheme for IPsec, based on the principles of trust management. A compliance check is added to the IPsec architecture that tests packet filters proposed when new security associations are created for confo ...

Keywords: Credentials, IPsec, KeyNote, network security, policy, trust management

49 <u>The family of concurrent logic programming languages</u>

Ehud Shapiro

September 1989 **ACM Computing Surveys (CSUR)**, Volume 21 Issue 3

Publisher: ACM Press

Full text available: pdf(9.62 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

Concurrent logic languages are high-level programming languages for parallel and distributed systems that offer a wide range of both known and novel concurrent programming techniques. Being logic programming languages, they preserve many advantages of the abstract logic programming model, including the logical reading of programs and computations, the convenience of representing data structures with logical terms and manipulating them using unification, and the amenability to metaprogrammin ...

50 <u>A holistic approach to service survivability</u>

Angelos D. Keromytis, Janak Parekh, Philip N. Gross, Gail Kaiser, Vishal Misra, Jason Nieh, Dan Rubenstein, Sal Stolfo

October 2003 **Proceedings of the 2003 ACM workshop on Survivable and self-regenerative systems: in association with 10th ACM Conference on Computer and Communications Security SSRS '03**

Publisher: ACM Press

Full text available: pdf(1.58 MB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

We present SABER (Survivability Architecture: Block, Evade, React), a proposed survivability architecture that blocks, evades and reacts to a variety of attacks by using several security and survivability mechanisms in an automated and coordinated fashion. Contrary to the ad hoc manner in which contemporary survivable systems are built-using isolated, independent security mechanisms such as firewalls, intrusion detection systems and software sandboxes-SABER integrates several different techno ...

Keywords: intrusion detection, overlay networks, survivability

51 Sensor databases: Cache-and-query for wide area sensor databases
Amol Deshpande, Suman Nath, Phillip B. Gibbons, Srinivasan Seshan
June 2003 **Proceedings of the 2003 ACM SIGMOD international conference on Management of data SIGMOD '03**
Publisher: ACM Press

Full text available: pdf(230.75 KB)   Additional Information: full citation, abstract, references, citings, index terms

Webcams, microphones, pressure gauges and other sensors provide exciting new opportunities for querying and monitoring the physical world. In this paper we focus on querying *wide area sensor databases*, containing (XML) data derived from sensors spread over tens to thousands of miles. We present the first scalable system for executing XPATH queries on such databases. The system maintains the logical view of the data as a single XML document, while physically the data is fragmented across a ...

52 Workshop on compositional software architectures: workshop report
May 1998 **ACM SIGSOFT Software Engineering Notes**, Volume 23 Issue 3
Publisher: ACM Press

Full text available: pdf(2.91 MB)   Additional Information: full citation, index terms

53 TINA: a natural language system for spoken language applications
Stephanie Seneff
March 1992 **Computational Linguistics**, Volume 18 Issue 1
Publisher: MIT Press

Full text available: pdf(1.86 MB)   Additional Information: full citation, abstract, references, citings
Publisher Site

A new natural language system, *TINA*, has been developed for applications involving spoken language tasks. *TINA* integrates key ideas from context free grammars, Augmented Transition Networks (ATN's), and the unification concept. *TINA* provides a seamless interface between syntactic and semantic analysis, and also produces a highly constraining probabilistic language model to improve recognition performance. An initial set of context-free rewrite rules provided by hand is first ...

54 A hierarchical access control model for video database systems
Elisa Bertino, Jianping Fan, Elena Ferrari, Mohand-Said Hacid, Ahmed K. Elmagarmid, Xingquan Zhu
April 2003 **ACM Transactions on Information Systems (TOIS)**, Volume 21 Issue 2
Publisher: ACM Press

Full text available: pdf(6.27 MB)   Additional Information: full citation, abstract, references, citings, index terms

Content-based video database access control is becoming very important, but it depends on the progresses of the following related research issues: (a) efficient video analysis for supporting semantic visual concept representation; (b) effective video database indexing structure; (c) the development of suitable video database models; and (d) the development of access control models tailored to the characteristics of video data. In this paper, we propose a novel approach to support multilevel acce ...

55 The state of the art in automating usability evaluation of user interfaces
Melody Y. Ivory, Marti A Hearst
December 2001 **ACM Computing Surveys (CSUR)**, Volume 33 Issue 4

Publisher: ACM Press

Full text available: pdf(2.31 MB)   Additional Information: full citation, abstract, references, citings, index terms, review

Usability evaluation is an increasingly important part of the user interface design process. However, usability evaluation can be expensive in terms of time and human resources, and automation is therefore a promising way to augment existing approaches. This article presents an extensive survey of usability evaluation methods, organized according to a new taxonomy that emphasizes the role of automation. The survey analyzes existing techniques, identifies which aspects of usability evaluation aut ...

56 Automatic Discovery of Part-Whole Relations

Roxana Girju, Adriana Badulescu, Dan Moldovan
March 2006 **Computational Linguistics**, Volume 32 Issue 1
Publisher: MIT Press

Full text available: pdf(735.62 KB)   Additional Information: full citation, abstract, index terms

An important problem in knowledge discovery from text is the automatic extraction of semantic relations. This paper presents a supervised, semantically intensive, domain independent approach for the automatic detection of part-whole relations in text. First an algorithm is described that identifies lexico-syntactic patterns that encode part-whole relations. A difficulty is that these patterns also encode other semantic relations, and a learning method is necessary to discriminate whether or not ...

57 Optimistic replication

Yasushi Saito, Marc Shapiro
March 2005 **ACM Computing Surveys (CSUR)**, Volume 37 Issue 1
Publisher: ACM Press

Full text available: pdf(656.72 KB)   Additional Information: full citation, abstract, references, citings, index terms

Data replication is a key technology in distributed systems that enables higher availability and performance. This article surveys optimistic replication algorithms. They allow replica contents to diverge in the short term to support concurrent work practices and tolerate failures in low-quality communication links. The importance of such techniques is increasing as collaboration through wide-area and mobile networks becomes popular.Optimistic replication deploys algorithms not seen in tradition ...

58 Process migration

Dejan S. Milojičić, Fred Douglis, Yves Paindaveine, Richard Wheeler, Songnian Zhou
September 2000 **ACM Computing Surveys (CSUR)**, Volume 32 Issue 3
Publisher: ACM Press

Full text available: pdf(1.24 MB)   Additional Information: full citation, abstract, references, citings, index terms, review

Process migration is the act of transferring a process between two machines. It enables dynamic load distribution, fault resilience, eased system administration, and data access locality. Despite these goals and ongoing research efforts, migration has not achieved widespread use. With the increasing deployment of distributed systems in general, and distributed operating systems in particular, process migration is again receiving more attention in both research and product development. As hi ...

59 Staging: Assimilating MetaBorg:: embedding language tools in languages

Jonathan Riehl

October 2006 **Proceedings of the 5th international conference on Generative programming and component engineering GPCE '06**

Publisher: ACM Press

Full text available: 📄 pdf(174.54 KB)   Additional Information: full citation, abstract, references, index terms

The MetaBorg usage pattern allows concrete syntax to be associated with application programmer interfaces (API's). Once a concrete syntax is defined, library writers use the Stratego language to write transformations from the concrete syntax to API data and calls in the host language. The result is a compile time translator from the combined host and domain languages to the host language. This translator is not programmable at compile time, and little or none of the infrastructure can be leverag ...

60 Model-driven design and deployment of service-enabled web applications

Ioana Manolescu, Marco Brambilla, Stefano Ceri, Sara Comai, Piero Fraternali

August 2005 **ACM Transactions on Internet Technology (TOIT)**, Volume 5 Issue 3

Publisher: ACM Press

Full text available: 📄 pdf(3.07 MB)   Additional Information: full citation, abstract, references, citings, index terms

Significant effort is currently invested in application integration, enabling business processes of different companies to interact and form complex multiparty processes. Web service standards, based on WSDL (Web Service Definition Language), have been adopted as process-to-process communication paradigms. However, the conceptual modeling of applications using Web services has not yet been addressed. Interaction with Web services is often specified at the level of the source code; thus, Web serv ...
